Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 10-16, 18 and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Durham in view of Chang et al 780'. The claims are unpatentable for the same reasons set forth on pages 2-3 in the office action dated 05-17-2006, with respect to claims 1-9.

Claims 17 and 20-29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Durham in view of Chang et al as applied to claims 10-16, 18, 19

Art Unit: 3742

above, and further in view of Richter et al (6,630,645). Durheim as modified by Chang et al teaches the claimed laser drilling system with a backing plate used against the workpiece. The claims call for a backing, which is tilted at a specific angle relative to the outlet opening of the workpiece. The patent to Richter et al is applied for teaching a laser drilling system with the angle of drilling through the work variable relative to the work. Thus the angle would also be variable relative to a stationary backing plate, as set forth in Durheim as modified. Use of a variable angle leads to more versatility in the drilling methods available to the apparatus and in view of this teaching it would have been obvious to modify the Durheim system further to include a variable angle laser Beam, to effect a more versatile method and system.

Note use of nitrogen and inert gases as the processing gases, as disclosed in the applied patents.

Conclusion

Applicant's arguments with respect to claims 10-29 have been considered but are moot in view of the new ground(s) of rejection. Note that the claims not treated in the preliminary amendment filed, are treated above, along with newly presented claims.
